

# S V S HARISH GUPTA

AI/ML Researcher · B.Tech Information Technology · Expected 2027

harishguptasvs@gmail.com | +91 6359595902 | Visakhapatnam, India | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

## RESEARCH PROFILE

B.Tech IT student with hands-on experience building production-grade AI/ML systems, including a deepfake detection pipeline (EfficientNet-B4 + Grad-CAM), an NLP-powered resume analysis engine, and an ML-based crop risk assessment model. Holds 14+ certifications across AWS AI/ML, Generative AI, and Quantum Computing. Interested in applied ML, explainable AI, and NLP research. Actively seeking research collaborations where I can contribute to real-world, large-scale AI problems.

## TECHNICAL SKILLS

**Languages:** Python, JavaScript (ES6+), Java, HTML5, CSS3

**ML & AI:** PyTorch, EfficientNet, Grad-CAM, OpenCV, spaCy, NLP, Scikit-learn, Generative AI, Prompt Engineering

**Web & Frameworks:** React.js, Flask, Tailwind CSS, REST APIs, Android Studio (Java)

**Tools:** Git, GitHub, VS Code, Docker (familiar), SQLite

## RESEARCH PROJECTS

**AI Deepfake Detection System** — PyTorch · EfficientNet-B4 · Grad-CAM · Flask · OpenCV · SQLite

- ▶ Built a production-grade deepfake detection web application using EfficientNet-B4, achieving robust image/video classification with Grad-CAM explainability overlays to highlight manipulated regions.
- ▶ Implemented an animated SVG confidence score ring UI and paginated detection history dashboard, enabling interpretable results for end-users beyond raw model output.
- ▶ Designed an end-to-end inference pipeline integrating OpenCV frame extraction, model inference, and SQLite-backed history — demonstrating full-stack ML engineering beyond academic scope.

**AI Resume Analyzer** — Python · NLP · spaCy · Keyword Extraction

- ▶ Engineered an NLP-powered resume analysis system using spaCy text processing pipelines to extract skills, keywords, and experience from unstructured resume text.
- ▶ Designed an automated feedback engine comparing resume content against job descriptions, achieving over 85% accuracy in skill extraction and role-fit scoring.
- ▶ Implemented structured improvement suggestions, reducing manual review effort significantly in simulated enterprise screening workflows.

**Crop Insurance Risk Assessment Engine** — Python · Machine Learning · Data Analysis (Andhra University Hackathon)

- ▶ Built a multi-factor ML risk assessment engine evaluating crop insurance risk using environmental, geographic, and historical agricultural datasets under hackathon time constraints.
- ▶ Developed a data ingestion and preprocessing pipeline to normalize inputs across multiple risk dimensions, feeding a scoring algorithm that classified risk levels for insurance decisions.
- ▶ Delivered a working prototype within the hackathon window, demonstrating applied data engineering and ML under pressure.

**Smart SOS Mobile Application** — Java · Android Studio · GPS Integration

- ▶ Developed a fully functional Android emergency alert app with one-tap SOS activation and real-time GPS-based location sharing to pre-configured emergency contacts.
- ▶ Designed a high-contrast, minimal UI optimized for rapid one-handed use under emergency conditions.

## EXPERIENCE

**Software Intern — AI Track** · Cisco Networking Academy

May 2026 – Jun 2026 (Ongoing)

- ▶ Completing an AI-focused internship covering modern machine learning applications, enterprise AI workflows, and real-world AI use case analysis.

- ▶ Earned two industry-recognized Cisco certifications: Introduction to Modern AI and Apply AI: Analyze Customer Reviews as part of the curriculum.

## EDUCATION

---

**B.Tech in Information Technology** · MVGR College of Engineering, Vizianagaram, AP Expected May 2027  
CGPA: 6.84 / 10

**Intermediate (MPC) — Class XII** · Narayana Junior College 2023  
Percentage: 73%

**Secondary School Certificate — Class X** · Narayana School 2021  
Percentage: 94.6%

## CERTIFICATIONS

---

### **AWS Training & Certification — AI/ML & Generative AI Track (May 2026)**

- ▶ Fundamentals of Machine Learning and Artificial Intelligence
- ▶ Developing Machine Learning Solutions · Developing Generative AI Solutions
- ▶ Essentials of Prompt Engineering · Optimizing Foundation Models
- ▶ Responsible AI Practices · Security, Compliance & Governance for AI

### **Cisco Networking Academy (2024–2026)**

- ▶ Python Essentials 1 & 2 · HTML Essentials · CSS Essentials
- ▶ Introduction to Modern AI · Apply AI: Analyze Customer Reviews

### **Quantum Fundamentals Program — WISER, Qubitech & Amaravati Quantum Valley (Feb 2026)**

- ▶ 4-week program equivalent to 1 academic credit, recognized by APSCHE.

## ACHIEVEMENTS

---

- ▶ Hackathon — Andhra University: Built a multi-factor Crop Insurance Risk Assessment Engine, demonstrating applied ML and data engineering under time constraints.
- ▶ Self-directed deepfake detection project using EfficientNet-B4 and Grad-CAM, showcasing production-level ML engineering beyond academic coursework.
- ▶ Earned 14+ certifications across AWS AI/ML, Cisco, and Quantum Computing, demonstrating consistent self-driven upskilling in emerging technologies.
